Skills

- C#
- Javascript
- HTML
- CSS
- SQL
- Node
- Git
- Bitbucket
- Jira

Experience

Hyland Software/ Developer II

May 2022 - Current

- Worked with C#, ASP.NET, and NServiceBus within an existing code base.
- Utilized Git, Bitbucket, Jenkins, and Octopus Deploy to update and deploy code changes
- Completed starter projects to learn the NServiceBus tech stack utilized on the Cloud Platform Development Team.
- Completed a project to migrate an older NServiceBus application to the latest supported version and resolved a long standing production issue by replacing the file watcher with a scheduled timer implementation and proper error handling to ensure graceful failure of the application.
- Completed and followed the department's Software Development Lifecycle (SDLC) which included project documentation, testing documentation, code review documentation, security review, and deployment documentation.

Underbelly/ Junior Developer

September 2021 - May 2022

- Designed and developed necessary functions and design elements for client needs on projects.
- Utilized React, Typescript, Cypress, Prisma, Jest, HTML, and CSS for app design and function.
- Used Git for quality assurance and version control of application changes.

Education

UVU / Bachelor's of Applied Science for Software Development

Fall 2021 - Current

- Currently enrolled at UVU to earn a BAS in Software Development.
- Member of the Honor Roll program
- Estimated graduation date of fall 2026
